PERSONAL PROJECTS

Support Desk App

- A full-stack support ticket system app that allows users to register, log in, view and create tickets as well as leave notes on the tickets. Built with MERN stack.

Space Invaders

- A 2D space shoot 'em up arcade game where the player controls a spaceship and must destroy invading monsters. Built with Vanilla JS using canvas for rendering, animations and graphics. The game includes bombs that destroy adjacent enemies as well as player booster and leveling features.

House Marketplace

- A React app that allows you to find and list houses for sale or rent.

GitHub Finder

- An app that allows you to search GitHub users and display their profile info using React hooks and Context.
